Pending Approval by GA NASW**

DSM-5 and ICD-10

for Mental Health Professionals

The seminar will consist of a general discussion of major changes in the organizational structure of the DSM-5 and ICD-10. There will be a specific focus on some of the new disorders as well as changes to some existing disorders. There will also be commentary on the relationships, including contrasts and comparisons, between the DSM-5, ICD-10, and ICD-11. Disclaimer: DSM and DSM 5™ are registered trademarks of the American Psychiatric Association. The American Psychiatric Association is not affiliated with nor endorses this seminar. ICD-10 and ICD-11 are copyrighted by the World Health Organization, which neither affiliated with nor endorses this seminar.

WORKSHOP OBJECTIVES

- Describe the relationships among DSM-5, ICD-10, and ICD-11 (Draft).
- Outline major differences between organization of DSM-IV and DSM-5.
- List disorders that have been added to, removed from, or changed in DSM-5.
- Summarize changes in conceptual and operational definitions in DSM-5.
- Answer questions related to general organization and specific application.
